Our Journey To
Safer Production

Since our founding in 2003, our mission has always been to support the food, pharmaceutical and processing industries with innovative, reliable and trustworthy detectable products; making the invisible, visible.

MADE IN BRITAIN

What began in the UK with a small range of metal-detectable stationery has grown into the world's largest range of Metal Detectable and X-Ray Visible products.

MADE IN THE USA

Today, our products are manufactured and supplied via our global network of locations in the UK, USA, Canada, Europe and Asia-Pacific; delivering consistency and local support wherever our customers operate.

We are proud that thousands of businesses worldwide rely on Detectamet products every day to protect their products, people and customers. This trust is our driving force and is not taken lightly.

Even after two decades, we see this as only the beginning. With your support, we will keep expanding our range of products to meet the ever-evolving challenges of foreign matter contamination, from sustainable pen ink refills to custom-products tailored to your operation.

A heartfelt thank you goes to everyone who has used, trusted, or even just considered our products. Your trust enables us to keep developing and delivering Detectable products that make a real difference.

Sean R. Smith
Founder & Chief Executive Officer

Key Icons
Explained

⌒ Metal Detectable

Identifies products that are metal detectable*.

👁 X-Ray Visible

Marks products that are X-ray visible*.

* Ensure your detection equipment is properly calibrated to maximise detection accuracy.

🍴 Food Safe

Signifies food contact approval, making the product suitable for food and pharmaceutical production environments.

⚙ **Customisable:**

Highlights options for customisation, such as branding, messaging or sequential numbering.

⊕ *See p. 130 - Refers to the page with more product information.*

Indicates the ink cartridge can be replaced to reuse the housing.

REFILLABLE • REFILLABLE

Built on Trust
& Excellence

Detectamet is the global leader in detectable safety products, trusted by food and pharmaceutical manufacturers worldwide to reduce contamination risk and protect brand integrity.

Physical contaminants can damage equipment, injure employees and cause costly recalls that can harm a brand's reputation. That's why our products are metal detectable and X-ray visible, providing essential protection throughout processing environments.

Our products are made from a patented EU and FDA food contact-approved polymer, engineered with the highest level of detectable additive, delivering unmatched safety without compromising durability.

Backed by ISO accreditations, a long-standing BRCGS partnership, EU & FDA-approved materials and SOFHT award recognition, Detectamet proudly offers proven, certified protection you can rely on.

We are ISO accredited in the following standards:
- **ISO 9001:** Quality Management.
- **ISO 14001:** Environmental Management.
- **ISO 45001:** Occupational Health & Safety Management.

This catalogue features a selection of our essentials, trusted by businesses worldwide. For our full, industry-leading range of detectable products, visit www.detectamet.global.

Our Best-Selling Retractable Pens
Built for Performance, Designed for Safety

Engineered for exceptional durability, our retractable pens are made from a proprietary detectable polymer that is both rugged and shatter-resistant, significantly reducing the risk of foreign body contamination in sensitive environments.

Each pen is designed to withstand demanding conditions without compromising structural integrity. The ergonomic grip ensures a secure, comfortable hold across a wide range of working environments.
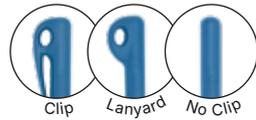

Discover the right pen for you:
- **Heavy-Duty Pen:** built for maximum resilience under pressure.
- **Elephant™ Pen:** a sleek, stylish alternative offering the same robust performance in a refined design.

Our Best-Selling Gloves
Designed to Protect, Ready to Perform

Bulk Pricing Available! The More You Buy, The More You Save!

Ensure ultimate food safety with Detectamet's Detectable Nitrile and Vinyl Gloves. Designed for high-risk food production environments, these gloves are engineered with metal-detectable materials to minimize contamination risks.

Built for comfort and durability, these gloves offer excellent hand protection without compromising flexibility and ease of movement. Their blue colour improves visibility, supporting quick identification. They are ideal for food handling applications and meet strict industry standards for hygiene and detectability. Available in multiple sizes, Detectamet gloves help maintain compliance while ensuring product integrity, because protecting your products begins with protecting your people.

Built for You
Custom. Detectable. Compliant.

Branding & Sequential Numbering

Detectamet offers laser engraving and pad printing. Engraving adds permanent sequential numbers for traceability; pad printing allows 1–2 colour logos on curved or irregular surfaces. Available on most products upon request.
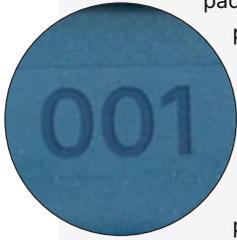

Colour Choices & Custom Materials

Many products are available in up to 11 colours to support HACCP systems. We can match custom colours for cleaning stations, shadow boards and even detectable engineering materials for specific applications.

Custom Sizes & Shapes

We offer custom dimensions across a wide range of products, from test pieces and silicone sheeting to tags and tools, ensuring a perfect fit for your needs (MOQ may apply).

Custom Printing & Labelling:

Tags, seals and labels can be printed with serial numbers, barcodes, or custom messages. Keyhole loop tags are available in heat-resistant options and can carry batch or cleaning data.
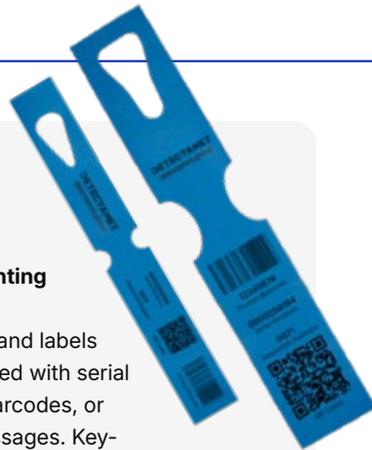

Shadow Boards & Cleaning Stations:

Designed to your specs, size, colour, artwork and layout. Wall-mounted or mobile options available, with a simple 6-step order process for fast delivery.

Signage & Safety Products:

Custom-sized and branded detectable signs (e.g. fire points) ensure safety messaging fits your site and complies with standards.

Accessories & Consumables:

From pallet bands to stationery, most small items can be branded or numbered. Customise knives, tools, workwear and more to match your processes.

Metal Detectable | X-Ray Visible | Food Safe

Colour-Coded for Food Safety
Colour coding helps prevent cross-contamination between allergens, raw and cooked foods, and production zones. Detectamet's knife range features colour-coded handles to support HACCP protocols and hygiene systems. This visual control aids safer workflows, clearer staff training, and easier audit compliance using detectable, food-safe materials.

Metal Detectable & X-Ray Visible Detectasil Silicone/Caulk Sealant

Product Code
Blue: 820-P01
Sold individually

Colours   **Size**
310 g

Neutral Cure Silicone
Better Adhesive Properties

- Detectasil® silicone caulk is a neutral cure sealant, which offers better adhesive properties for a greater number of materials including PVC-U, most other plastics, glass, aluminium, lead, stone, masonry, and polycarbonate.
- Suitable applications: windows & doors, wall panels, machinery, finishing, basins, and other sanitary ware.

- Service temperatures of -30°C to +150°C (-22° to 302°F).
- **Tube length:** 32 cm (including nozzle).
- **Diameter:** 5 cm.
- Not safe for food contact.
- Unpalatable to rodents.
- For use with a standard applicator gun.
- **Long service life:** unopened will store for 12 months.

Matte

Glossy

- Patented silicone polymer infused with high-level detectable additives delivers reliable detection by standard metal detectors and X-ray systems, reducing foreign body risk. Food Safe.
- **Temperature Resistance:** Matte grade: –60 to +200 °C (–76 to 392 °F); Glossy grade: extends up to +225 °C (437 °F). Performs in cooking, chilling, freezing, and CIP processes.
- **Durable, versatile & customisable:** Available as sheets, strips, and extrusions; blue colour aids traceability and colour-coding.

Metal Detectable & X-Ray Visible PTFE

Product Code: 835 │ **Sold individually**

Colour

Sizes
Custom sizes and shapes (sheets, rods, tubes).

- Blue, metal detectable and X-ray visible PTFE (sheets, rods, tubes).
- Food-grade material for foreign-body control in food and pharmaceutical applications.
- Low-friction, non-stick surface, and excellent chemical resistance.
- High temperature performance (continuous use up to ~260 °C / 500 °F).
- Easy to machine into OEM parts and line-side spares.
- FDA and EU 10/2011 compliant materials.
- Custom and bespoke sizes available.

Metal Detectable
UHMW-PE

Product Code: 823 │ **Sold individually**

Colour

- Custom sizes and shapes available.
- Also available in rod form for unique application.

Detectamet UHMW Features	Benefit in Food Environments
High Detectability (Metal)	Detectable by industry-standard metal detectors, reducing contamination risk.
FDA & EU Food-Contact Approved	Fully compliant with FDA & EU Directive 2002/72 EC, ideal for direct food contact parts.
Exceptional Mechanical Strength	Excellent toughness, impact resistance, and abrasion resistance; Shore D 68.
Ultra-Low Friction	Coefficient of friction <0.2 µ ensures smooth operation, perfect for conveyors and wear strips.
Wide Temperature Range	Operates reliably from −200°C (cryogenic) up to +80°C.
Easily Machinable	We can precision-machine this material into complex rollers, chain guider elements, wear strips, funnels, bushings, corner wear bends, idler wheels. Just Ask!
Blue Colour Visual Tracking	Distinctive blue colour enhances visual inspections and prevents stray parts mixing.

Stainless Steel Universal Cleaning Trolley

Product Code: T867-P45
Sold individually

Colour

Assembled Size
96.7 x 44.7 x 100 cm
(38.07 x 17.60 x 39.37″)
Top and middle shelf thickness:
0.8 mm (31.5 mil)
Bottom shelf thickness:
1.2 mm (47.2 mil)

Universal hooks & grippers

Front Corner bumpers

2 Lockable wheels

Flat Pack Box Dimensions
65 x 28 x 100 cm (25.59 x 11.02 x 39.37″)

Lightweight
18 kg (39.68 lbs)

Note: Tools sold separately.

- Manufactured from Heavy Duty 304 Stainless Steel, 08 thickness 22 mm tube.
- Standardised dimensions to securely hold a wide variety of equipment.
- Secure locking castor wheels.
- Ergonomic push handle.
- Accessory shelf.
- Deep reinforced lower tray.
- Hygienic, welded seams.
- Silver Mirror Finish.
- 304 Stainless Steel 101.6 mm (4″) solid rolling wheels.
- 3 Stainless Steel shelves.

Shadowboards & Security Cages

Designed for BRCGS Compliance

Detectamet's cleaning range is purpose-built to help food production sites meet BRCGS Food Safety and Packaging standards.

Hygienic by Design: Our brushes are made from food-safe, EU and FDA-approved materials, with resin-set bristles for maximum filament retention, helping to prevent contamination.

Fully Detectable: Handles and bristles are metal and X-ray detectable to support foreign-body control in high-risk zones.

Built to Last: Durable, wood-free construction withstands heat (autoclavable up to 134°C) and cleaning regimes without breaking or shedding.

Colour-Coded & Customisable: Available in a variety of vibrant colours to support segregation by area or task, with options for laser engraving and looped handles for easy identification and hygienic storage.

Audit Ready: Backed by food-contact declarations and traceability documentation to support compliance during inspections.

Metal Detectable & X-Ray Visible Shadow Boards

Reduce your costs by improving equipment accountability and minimising production interruptions.

Colour coding
Our Shadow Boards can be colour-coded, enabling workplace segregation to reduce the risk of cross-contamination.

Sequential numbering
The optional addition of sequential numbering printed on the board and engraved on corresponding tools gives you total traceability of tools and equipment across departments and production areas.

Total customisation
We'll build the perfect Shadow Board to your specifications. Choose your selection of tools, colour coding and unique tool identification. Add company branding and colours to finish the look.

Secure storage
Add a security cage with a lockable or magnetic door to keep tools safe.

Fully detectable boards
All components on our Shadow Boards can be manufactured to be fully metal detectable.

Fully detectable tools
Give yourself peace of mind by equipping your Shadow Board with our detectable range of tools.

Total traceability
Use colour-coding and sequential numbering to give total traceability of tools and equipment.

Moveable trolleys
Our Shadow Boards can be trolley mounted for easy manoeuvrability through your processing environment.

Start reducing your wasted costs now
By using our Shadow Boards, your tools and equipment are organised, kept in good condition, and stored cleanly and efficiently — reducing wasted costs from non-returned items and interruptions to production.
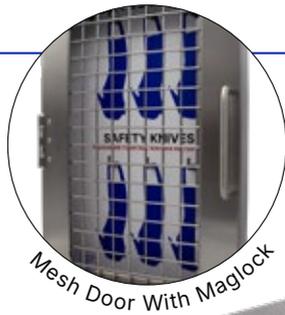

Discuss your requirements
Contact your local Detectamet office to discuss your Shadow Board requirements. Our dedicated account managers will be on hand to coordinate your shadow board production and delivery.

Mesh Door With Maglock

Colour

Size
Standard: 302 x 520 x 70 mm
(11.81 x 19.68 x 2.75″)
Large: 452 x 767 x 70 mm
(17.71 x 29.52 x 2.75″)

Product Code	Size	Type Of Door
620C-S090-T828	Standard	Mesh door with sidelock
620C-S091-T823	Large	Mesh door with sidelock
620C-S090-T829	Standard	Mesh door with maglock
620C-S091-T829	Large	Mesh door with maglock
620C-S090-T830	Standard	Polycarbonate door with sidelock
620C-S091-T830	Large	Polycarbonate door with sidelock
620C-S090-T831	Standard	Polycarbonate door with maglock
620C-S091-T831	Large	Polycarbonate door with maglock

Polycarbonate Door + Sidelock

Key features

- **Lockable for Security:** Equipped with either magnetic or Sidelocks, preventing unauthorised access to tools and sharps.
- **Customisable Door Options:** Choose from stainless steel mesh, or polycarbonate doors for optimal visibility and hygiene.
- **Two Standard Sizes Available:** Standard 302 x 520 mm/Large: 452 x 767 mm
- **Custom Shadow Board Backing (Optional):** Supports tool traceability and organisation by outlining exact tool placement.

- **Hygienic and Easy to Clean:** Designed for high-care zones; smooth surfaces reduce risk of bacterial buildup.
- **Sloped Top:** A sloped top reduced potential dust buildup and allows easy cleaning/wipe down.
- **Highly Durable:** Robust enough for daily industrial use in demanding food production environments.

BRCGS | In Partnership with
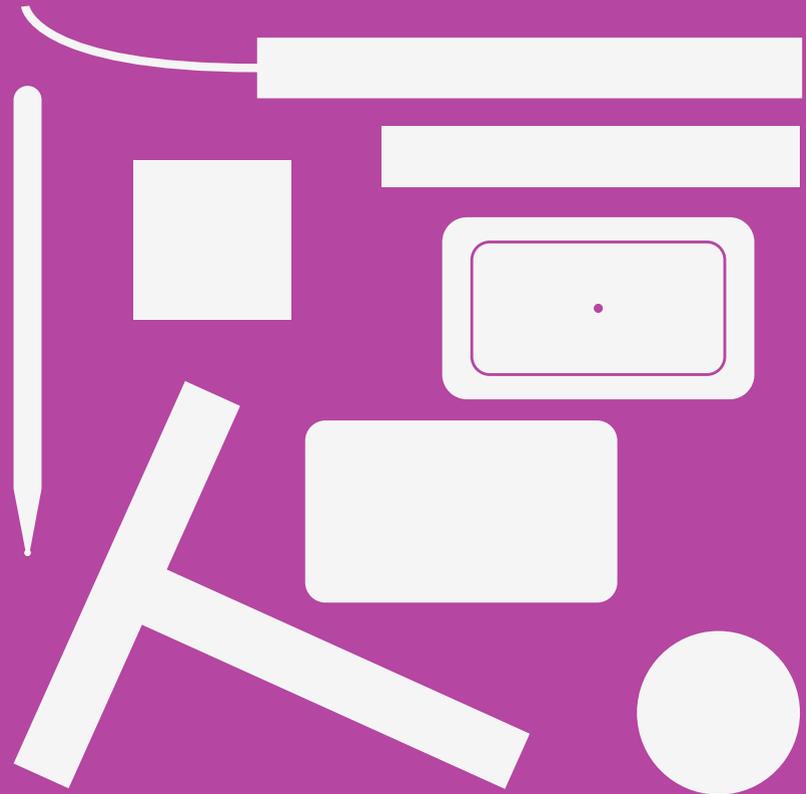

Metal Detectable & X-Ray Visible
Calibration Test Pieces

Accurate calibration of detection equipment is essential to ensure your food production line performs reliably and meets detectable protection standards. Detectamet's certified test pieces help verify that your metal or X-ray detection systems are properly calibrated for your specific products, packaging, contaminant types, equipment and sensitivity, ensuring consistent and audit-ready performance.

HACCP Compliance

HACCP standards require inspection equipment at critical control points with routine QA testing and documented results. Using Detectamet's test pieces to calibrate your detection systems helps you maintain compliance and clearly demonstrate your commitment to an effective Quality Management System.

Calibrated and Certified to BS EN ISO 9002 and UKAS
All test pieces are supplied with a Certificate of Conformity detailing size, contaminant type, and ISO/UKAS certification, enabling traceability of the manufacturer. Each piece is laser engraved with a unique number matching the certificate for enhanced tracking and audit compliance.

Metal Detection
Housing Styles

Each shape is designed to replicate real-world contamination scenarios specific to your production process, ensuring metal detectors are accurately tested under realistic conditions. Detectamet's wide range of housing styles helps manufacturers meet BRCGS, IFS and retailer audit requirements with confidence. Custom housing sizes are available on request, speak to our sales team for details.

High-visibility acrylic

Brightly coloured to match contaminant type, these food-safe test pieces are highly visible if dropped and easy to identify at a glance. Durable and laser-etched, each comes with full traceability and certification.

Vibrant & Traceable

Clear acrylic

Made from transparent acrylic with colour-coded lasered text, these allow operators to visually confirm contaminant size and position, ideal for training, audits and visual QA checks. Supplied with full documentation.
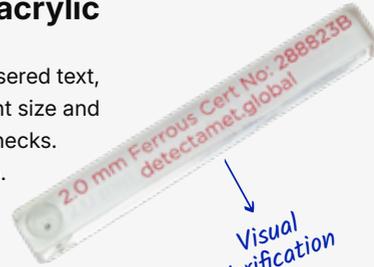

Visual Verification

Acetal

FDA-compliant acetal offers high strength, stiffness, and resistance to impact, moisture, and chemicals. Perfect for wet or high-wear environments, with colour coding, laser marking and certification included.

> 14 mm: 100 x 30 x 30 mm (± 2.0) 3.93 x 1.18 x 1.18" (± 0.01)

Material Options
Hi-Vis Acrylic, Clear Acrylic, Acetal.

Popular Contaminant
Ferrous, Non-Ferrous, Stainless Steel 304/316.

Metal Detector
Test Puck

Product Code: PUCK | **Sold individually**

- Compact design for smaller detector openings, with curved edges to minimize snagging.

Standard Sizes
Diameter: 35 mm x 10 (± 2.0) mm
Thickness: (1.37 x 0.39") up to 8 mm (0.31")

Material Options
Hi-Vis Acrylic, Clear Acrylic, Acetal.

Popular Contaminant
Ferrous, Non-Ferrous, Stainless Steel 304/316.

Metal Detector
Test Ball

Product Code: BALL
Sold individually

- Spherical shape ideal for throat/pipeline metal detectors typically used for detection in liquids.

Standard Sizes
30 mm (1.18"): up to 10 mm contaminant.
40 mm (1.57"): up to 15 mm contaminant.
50 mm (1.96"): up to 25 mm contaminant.

Material Options
Hi-Vis Acrylic, Clear Acrylic.

Popular Contaminant
Ferrous, Non-Ferrous, Stainless Steel 304/316.

Metal Detector
Flexi Test Stick

Product Code: FLEXI │ **Sold individually**

- The flexible shaft bends around machinery and conveyors, ideal for manually placing test contaminants in hard-to-reach areas.

Contaminant Here

Standard Sizes
Handle: 100 x 20 x 20 mm (3.93" x 0.78" x 0.78")
Hosing outside dia.: < 6 mm: 8 mm (0.31")
Hosing length: 500 mm (19.68")

Material Options
Hi-Vis Acrylic, Clear Acrylic, Acetal.

Popular Contaminant
Ferrous, Non-Ferrous, Stainless Steel 304/316.

Metal Detector
Test Card

Product Code: CARD │ **Sold individually**

- Flat, stable surface for consistent contaminant simulation and quick handling on fast lines.

Standard sizes
< 8 mm: 80 x 40 x 10 (± 2.0) mm (3.14 x 1.57 x 0.39 (± 0.07) ")

Material Options
Hi-Vis Acrylic, Clear Acrylic, Acetal.

Popular Contaminant
Ferrous, Non-Ferrous, Stainless Steel 304/316.

Metal Detector
Test Cube

Product Code: CUBE │ **Sold individually**

- Compact 3D form for conveyor and tray stability. Simulates bulk or free-flowing contamination. Equal dimensions for consistent testing and easy handling.

Hi-Vis Acrylic

Standard sizes
< 14 mm: 20 x 20 x 20 (± 2.0) mm (0.78 x 0.78 x 0.78 (± 0.07) ")
14 mm: 30 x 30 x 30 (± 2.0) mm (1.18 x 1.18 x 1.18 (± 0.07) ")

Material Options
Hi-Vis Acrylic, Clear Acrylic, Acetal.

Popular Contaminant
Ferrous, Non-Ferrous, Stainless Steel 304/316.

X-Ray Detection
Housing Styles

X-Ray housing styles are dual-use, as any metal detectable contaminant will also work for calibrating a metal detector. Custom housing sizes are available on request, speak to one of our sales team for details.

X-Ray Detector
ID Test Card

BEST SELLER!

Product Code: ID TEST CARD │ **Sold individually**

- Slim, wipe-clean laminated X-ray card with multi-bearing contaminant inserts and high-visibility colour coding, designed to slide easily between packaged or tray-assembled products.

Standard Sizes
< 6 mm: 54 x 86 mm (2.12 x 3.39")

Material Options
Laminate.

Popular Contaminant
Ferrous, Non-Ferrous, Stainless Steel 304/316.

X-Ray Detector
Foam Test Card

Product Code: X-RAY CARD
Sold individually

- PVC foam provides excellent contrast for X-ray detection without interfering with machine sensitivity. The low-density housing simulates real product conditions and ensures consistent image clarity during system checks.

Material Options
PVC Foam.

Popular Contaminant
Ceramic, Glass, PTFE.

Standard sizes
< 8 mm: 80 x 40 x 10 (± 0.5) mm (3.14 x 1.57 x 0.39")

X-Ray Detector
Laminated Test Card

Product Code: LAMINATED CARD │ **Sold individually**

- Made from white PVC foam with a laminated backing, this ultra-thin (~3 mm) card slides easily between packaged or tray-based products for X-ray calibration. Features high-visibility colour coding and a wipe-clean surface.

Material Options
PVC Foam + Laminate seal.

Standard sizes
84 x 60 x 3 mm (3.30 x 2.36 x 0.11") up to 4 mm contaminant.

Popular Contaminant
Ceramic, Glass, PTFE.

X-Ray Detector
Test Pen

Product Code: PEN │ **Sold individually**

- Holds up to a 5 mm contaminant for precise placement in X-ray and metal detectors. The pen-like design offers ergonomic grip and control.

Standard sizes
150 x 8.3 mm
(5.91 x 0.33")
Up to 5mm (0.20")
contaminant

Material Options
Acetal.

Popular Contaminant
Ceramic, Glass, PTFE.

X-Ray Detector
Test Straw

Product Code: TEST STRAW
Sold individually

- Visible tube is ideal for testing detector sensitivity in bulk or free flowing products. The transparent housing allows visual confirmation of the contaminant.

Standard sizes
200 x 5 mm
(7.87 x 3/16")
Up to 3 mm
(1/8") contaminant

Material Options
Clear Acrylic Tube.

Popular Contaminant
Ceramic, Glass, PTFE.
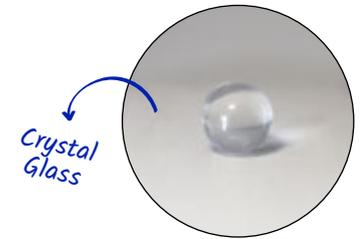

X-Ray Detector
Loose Bearings

Product Code: BEARING │ **Sold individually**

- Ideal for simulating real contamination with no interference from surrounding materials.

Material Options: Ceramic AL2O3, Soda Lime Glass, Borosilicate Glass, Crystal Glass, Quartz Glass, PTFE (Teflon), Nylon Grade 1 , Rubber Nitirle, Zirconia.

Crystal Glass

Standard sizes
Ranges of sizes available up to 12 mm.

Metal & X-Ray
Detector Test Kit

Product Code: 945-T744-X44
Sold individually

- Available as standard or completely custom, with your requested test wands fitted within purpose-cut housing.
- Supplied with all relevant Certificates of Conformity free of charge.
- The perfect way to store a range of contaminant sizes & types to calibrate your detection system.

Contaminant Sizes
Ferrous, Non Ferrous & Stainless Steel 316:
0.5, 1.0, 1.5, 2.0, 2.5, 3.0, 3.5, 4.0 mm
(0.01, 0.04, 0.06, 0.08, 0.1, 0.12, 1.14, 0.16")

Custom Test Kit

- Fully customisable case combining metal detector and X-ray test pieces in one audit-ready kit. Tailored to your contaminant types, sizes, and housing, with cut foam insert, traceable codes and certification.

Customisable
Sequentially Numbered

BEST SELLER!

Adding sequential numbering to our products gives complete traceability of tools and equipment in your production environment. Sequentially numbering tools is particularly important if production presents higher risks, making it even more important to eliminate any type of contamination.

Branded

Add your company branding or message to a wide variety of our detectable products. Branding is applied to polymer-based products using a pad printing process and applied to metallic surfaces using laser engraving.

Colour Coding

A variety of our products are available in a selection of colours and many are available in our nine standard manufacturing colours. Colour coding can be used to reduce cross-contamination and enhance traceability of tools and equipment. Try colour coding yours by factory zone, allergen type or days of the week.

Custom Products

Looking for a detectable product we don't stock? We have the design expertise and manufacturing capability to produce custom metal detectable items, tools and equipment.

CORPORATE TERMS & DISTRIBUTION AGREEMENTS

Contact us today to discuss corporate terms or bulk distribution pricing. Scan the QR code on the back cover or visit detectamet.global to connect with your regional office.

Place Your Order

Phone   **Web**   **Email**

All Detectamet products have been tested under food industry conditions. Detectability can vary based on factors such as product composition, environmental conditions and the configuration of metal or X-ray detection systems. For best results, choose the most suitable product for your application and regularly verify detector calibration.
