# Accreditations

At Detectamet we take our business very seriously, which is why we are ISO accredited in 9001: Quality Management, 14001: Environmental Management and 45001: Occupational Health and Safety

**Awards** - Over the years, we've collected awards for our innovative products

**Chamber  
Bridlington  
& Central Coast  
Business Awards**

## Why you need detectable products:

Food, drink and pharmaceutical industries need to prevent/reduce the risk of foreign body contamination. Physical contaminants can damage equipment and cause injury. If they reach the consumer you will be faced with an expensive recall, which could harm your reputation. The safest way to eliminate and protect against this risk is to use metal detectable and X-ray visible products in all areas of your product preparation areas.

## What do you get from Detectamet:

Detectamet's product range offers you the best detectability, made from a patented, unique polymer that contains the highest level of detectable additive, without compromising on durability, and manufactured from EU & FDA (Food and Drug Administration) food contact approved materials.

- Patented, unique polymer - contains highest levels of detectable additive in the market
- All products comply with EU and FDA food contact regulations
- Durable products - minimise risk of breaking
- Largest range of detectable products on the market
- Branding/serialisation available with in-house laser engraver/pad printer
