Why you need detectable products:

Food, drink and pharmaceutical industries need to prevent/reduce the risk of foreign body contamination. Physical contaminants can damage equipment and cause injury. If they reach the consumer you will be faced with an expensive recall, which could harm your reputation. The safest way to eliminate and protect against this risk is to use metal detectable and X-Ray visible products in all areas of your product preparation areas.

What do you get from Detectamet:

Detectamet's product range offers you the best detectability, made from a patented, unique polymer that contains the highest level of detectable additive, without compromising on durability, and manufactured from EU & FDA (Food and Drug Administration) food contact approved materials.

- Patented, unique polymer - contains highest levels of detectable additive in the market
- All products comply with EU and FDA food contact regulations
- Durable products - minimise risk of breaking
- Largest range of detectable products on the market
- Branding/serialisation available with in-house laser engraver/pad printer

Detectable Safety Knife Features

Ensure you choose the correct knife for your required purpose by consulting the Safety Knife Features outlined below and listed on each product description.

Replacement Blades Available

We offer replacement blades for many of our safety knives.

Cardboard

Suitable for cutting through cardboard packaging. For consistent cutting of thicker cardboard, we recommend our Heavy Duty Knife Range.

Plastic Wrapping

Suitable for cutting through plastic wrapping.

Sacks/Plastic Bags

Suitable for cutting through plastic sacks and bags.

Plastic Netting

Suitable for cutting through plastic netting.

Plastic Adhesive Tape

Suitable for cutting through plastic adhesive tape.

Bubble Wrap

Suitable for cutting through bubble wrap.

Plastic Strapping

Suitable for cutting through plastic strapping, usually found wrapped around cardboard boxes.

Retractable Blade

Some of our detectable knives are retractable for added safety.

Disposable Knife Range

A lightweight, shorter-lasting knife that is disposable. Suitable for lighter materials such as thinner cardboard and plastic wrapping.

Normal Duty Knife Range

A longer-lasting knife, capable of cutting a variety of products, from lighter materials to thicker plastics and card.

Heavy Duty Knife Range

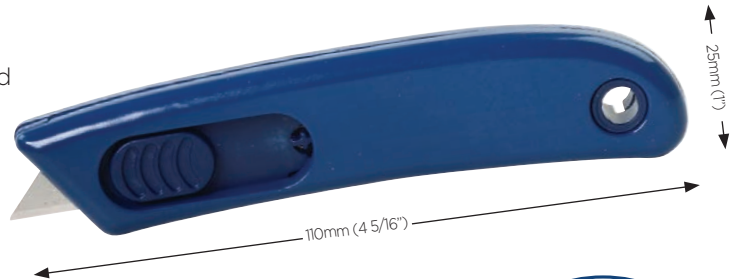

Our longest lasting range of knives, resilient to consistent cutting of thicker packaging, including heavy duty cardboard.

Disposable Metal Detectable Safety Knives with Auto Retracting Blade

FR: Couteau de sécurité à lame jetable
 ES: Navaja de seguridad con hoja desechable
 DE: Sicherheitsmesser mit Einwegklinge

These detectable disposable safety knives are light and compact in shape and ideal for cutting packaging.

SUITABLE FOR LASER ENGRAVING

Ensure complete traceability with sequential numbering on your products

Using detectable equipment is an essential step towards preventing foreign body contamination. However, mistakes do happen, and equipment can go missing during a shift. Sequential numbering gives you complete traceability and is particularly important if production presents higher risks, making it even more important to eliminate any type of contamination.

Detectamet offer a laser engraving service which adds sequential numbers onto your knives (and other products).

This allows you to record knives issued to staff at the start of a shift, check against that record at the end of the shift and if a missing tool is discovered, investigate its whereabouts immediately.

The safest way to eliminate and protect against this risk is to use metal detectable and X-Ray visible products in all areas of your product preparation areas.

**SEQUENTIAL PRODUCT
NUMBERING AVAILABLE

PRODUCT CODE: 606-Q06-T226

PROFESSIONAL KNIVES

Our detectable professional knives are made from fully hardened and tempered stainless steel to ensure maximum edge retention.

The handles are manufactured from EU & FDA food contact approved detectable polymer.

To achieve maximum hygiene levels, handles are insert moulded to the blades, preventing build-up of contaminants and allowing it to withstand rigorous sterilising and dishwasher use.

In Partnership with
BRCGS

18

Handles

Depending on knife function and frequency of use, handles come in two different shapes:

Regular – designed for holding the knife safely and comfortably for long periods

Ergo – designed for all day use by reducing stress to the hand and wrist and providing thumb support

Edges and Blades

We offer three different types of blade, dependent on function:

Plain – ensures a fine, robust, long lasting edge, predominantly used in the meat processing industry

Serrated/wavy – the teeth along the blade edge allows a tough cut, whilst protecting the softer inner of a product. This is the perfect edge for cutting bread and pastry

Scalloped – with scallops running on each side of the blade, air can enter between the blade and cut products, allowing the cut slice to easily fall away making it perfect for slicing meat

Colour Coding System

It is crucial to minimise the spread of contamination when dealing with certain allergens that could present a serious threat to health or life. To minimise this risk our knife handles are available in nine detectable colours.

etectamet

Metal Detectable & X-Ray Visible Vegetable Knives

FR: Couteau à légumes
 ES: Cuchillo para verduras

PRODUCT CODE: 826-S375-P01 (610 x 457 x 10mm)
826-S376-P01 (610 x 457 x 50mm)

Knife Safety

Having picked the best knife for the job, the next challenge is to ensure the knife is used correctly. If a knife is handled incorrectly, there is a high possibility of either damage to contents, injury or waste contamination.

Tips and techniques:

- Select correct knife
- Train staff to use correctly
- Position package so it's easy to hold and don't overstretch
- Make one clean, firm, effective cut to avoid creation of potential contaminants
- After use retract blade, store knife safely and dispose of rubbish instantly
- Replace blunt blades immediately
